LICENSE AGREEMENT

By installing this Software product («ScyCatsLab CoPilot» - MSFS2020 addon), you agree to be bound by the terms of this Agreement. If you do not agree to the terms of this Agreement, please, do not install or use the Product.

You may install the Software onto a single computer for your personal, noncommercial use subject to these conditions:

1. You may not copy, modify, rent, sell, distribute or transfer any part of the Software except as provided in this Agreement, and you agree to prevent unauthorized copying of the Software.
2. You may not reverse engineer, decompile, or disassemble the Software.
3. You may not sublicense or permit simultaneous use of the Software by more than one user.
4. The Software may include portions offered on terms in addition to those set out here, as set out in a license accompanying those portions.
5. REFUND POLICY: As you have ability to use DEMO version and check is it work or not BEFORE purchase, NO REFUND may be given.
6. Serial key may be activated with one aircraft installed for only one Computer ID. After first activation your serial key may be used with the same aircraft at the same computer (detected as Computer ID).

THE SOFTWARE IS PROVIDED "AS IS" WITHOUT ANY EXPRESS OR IMPLIED WARRANTY OF ANY KIND INCLUDING WARRANTIES OF MERCHANTABILITY, NONINFRINGEMENT, OR FITNESS FOR A PARTICULAR PURPOSE.

SkyCatsLab does not warrant or assume responsibility for the accuracy or completeness of any information, text, graphics, links or other items contained within the Software.

Additional info Regarding .dll files usage - see License.txt file in "skycatslab-copilot" folder.

STEP-BY-STEP

1. Setup speech/recognition engine at your computer (read below)
2. Copy CoPilot plugin files to your "Community" folder (read below)
3. Load aircraft and setup copilot usage (read below)
4. Load PMDG 737-800 with special livery. Check what you see copilot in cockpit, it animated, speak and recognize your voice command.
5. Use.

SETUP SPEECH RECOGNITION (WINDOWS 10)

Please be sure what US English language pack is already installed and English selected as Windows display language

Please select English language for Recognition, run voice preview, setup microphone.

Next turn recognition On (You may skip this step if you have Non-English interface at your Windows)

If you will get this error, you need setup English as user interface language (Windows display language) and English as your recognition language (language you speak with your device) and reload computer.

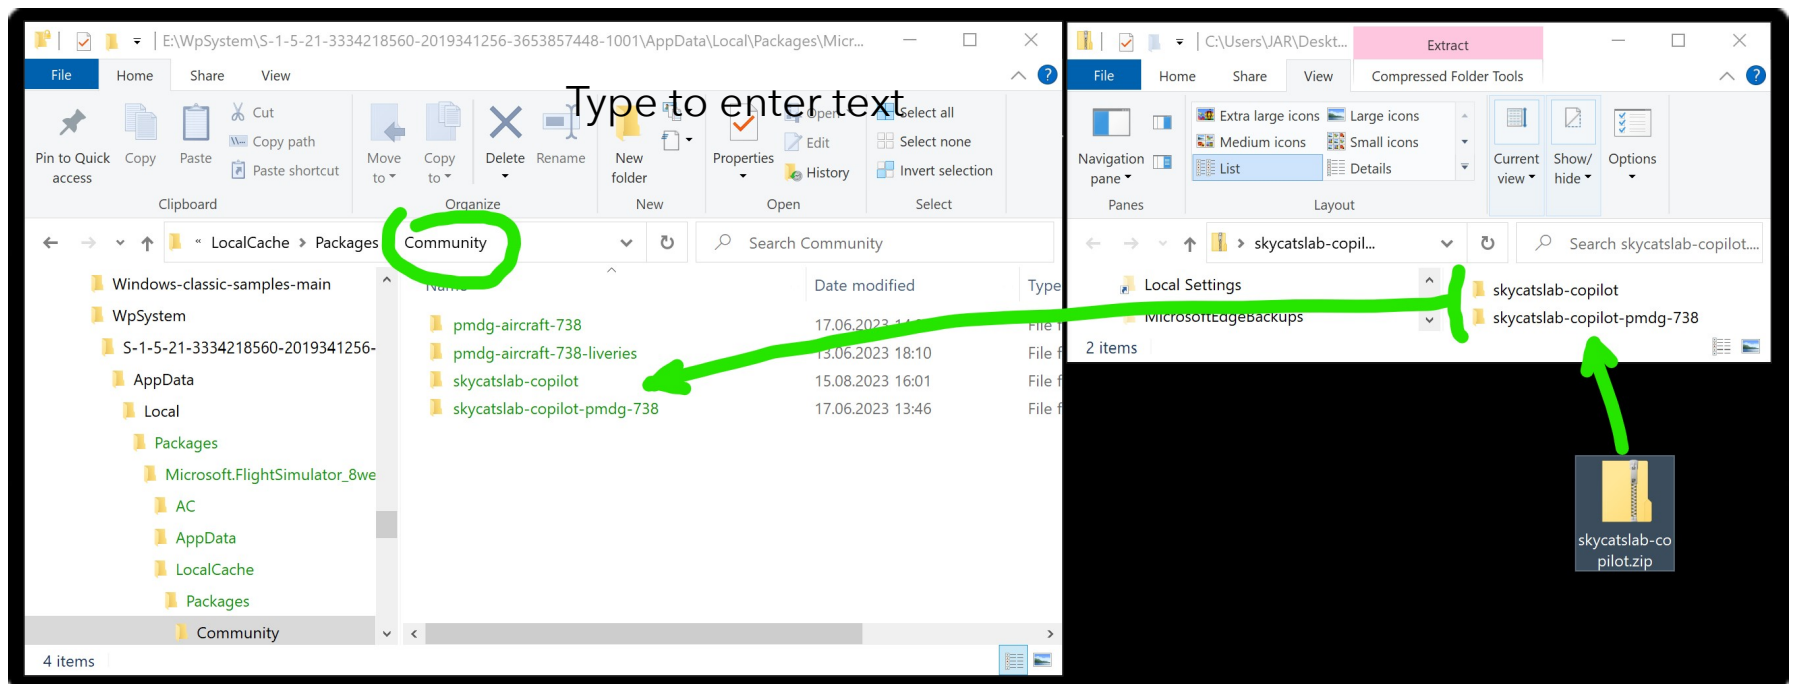

Please use this basic manual if need:

<https://www.windowcentral.com/how-set-speech-recognition-windows-10>

INSTALLATION

1. Find your "Community" folder.

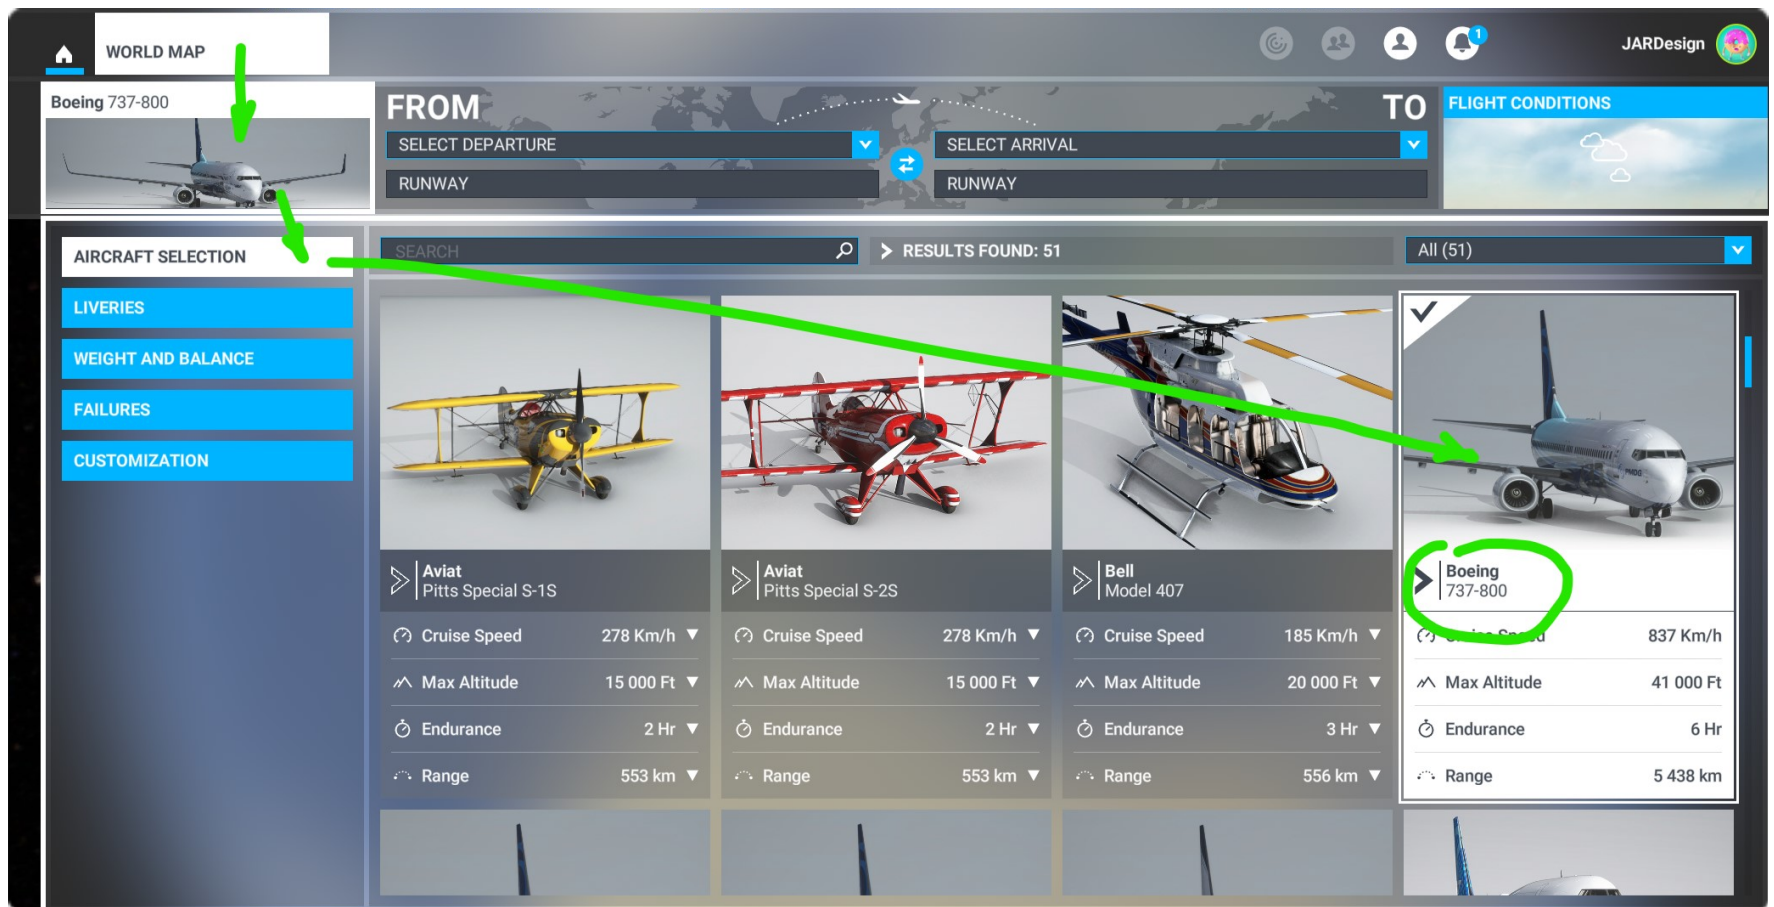

2. UnZip copilot distributive and put all folders from ZIP pack to "Community" folder.

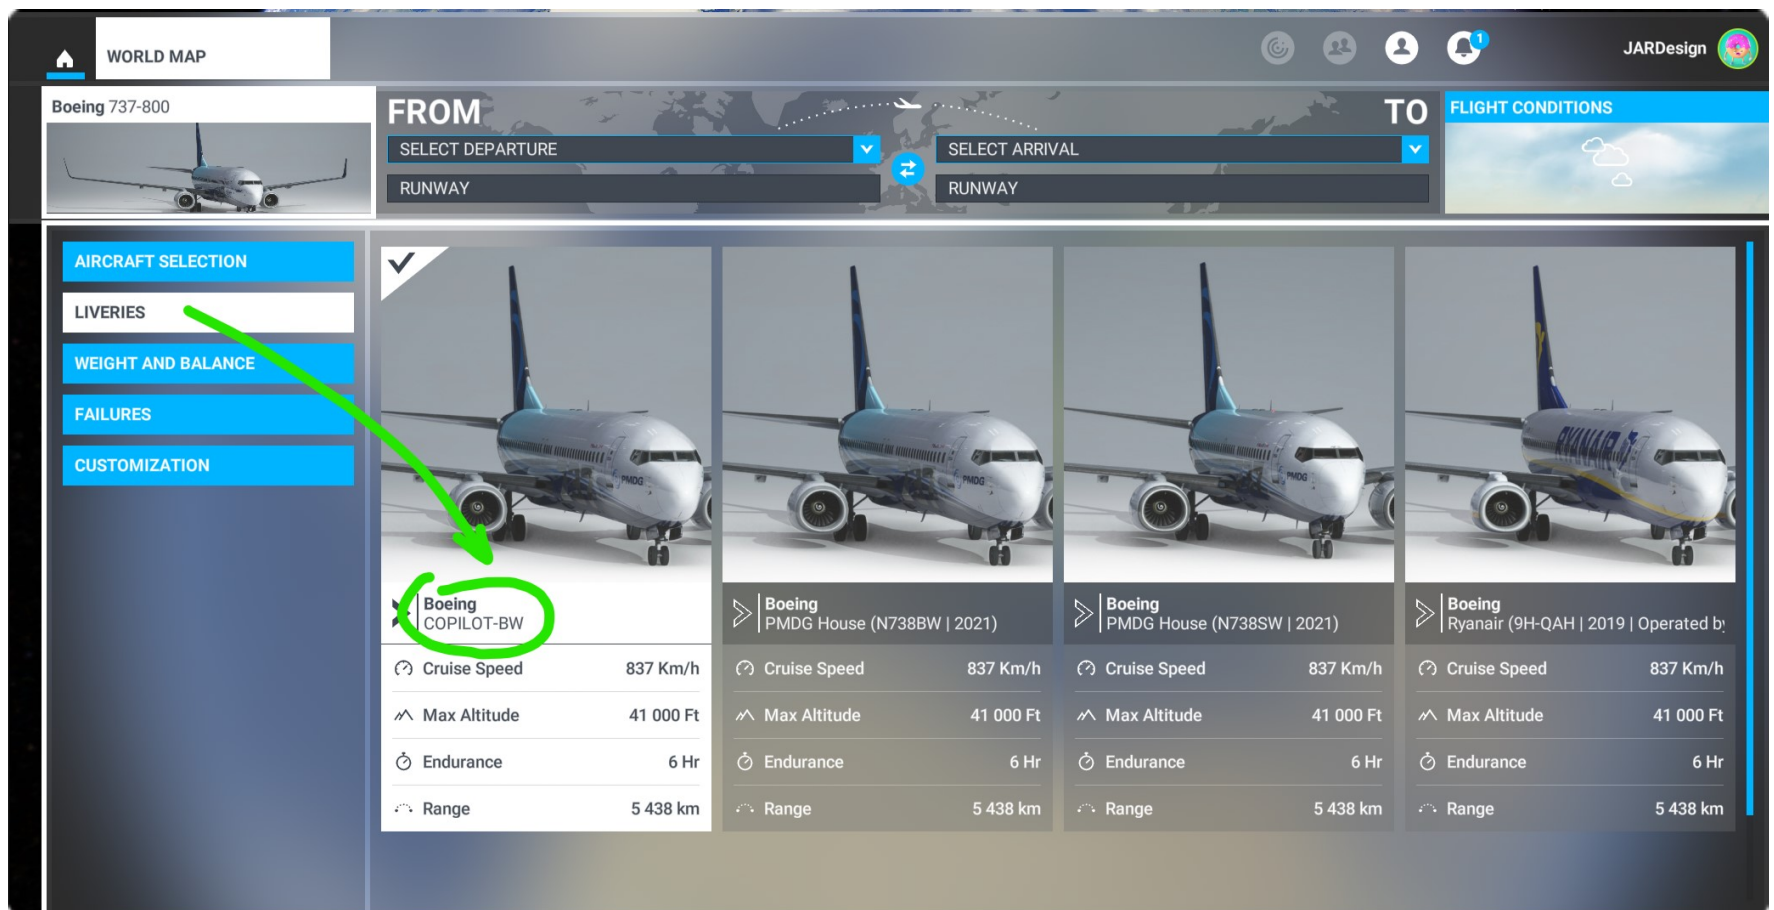

3. Run MSFS2020, open Options->General Options->MISC and set COPILOT_LINDA as CO-PILOT AVATAR.

4.Go to WORLD MAP -> AIRCRAFT SELECTION and select PMDG 737-800 model

5.Go to LIVERIES selection and select special COPILOT livery.

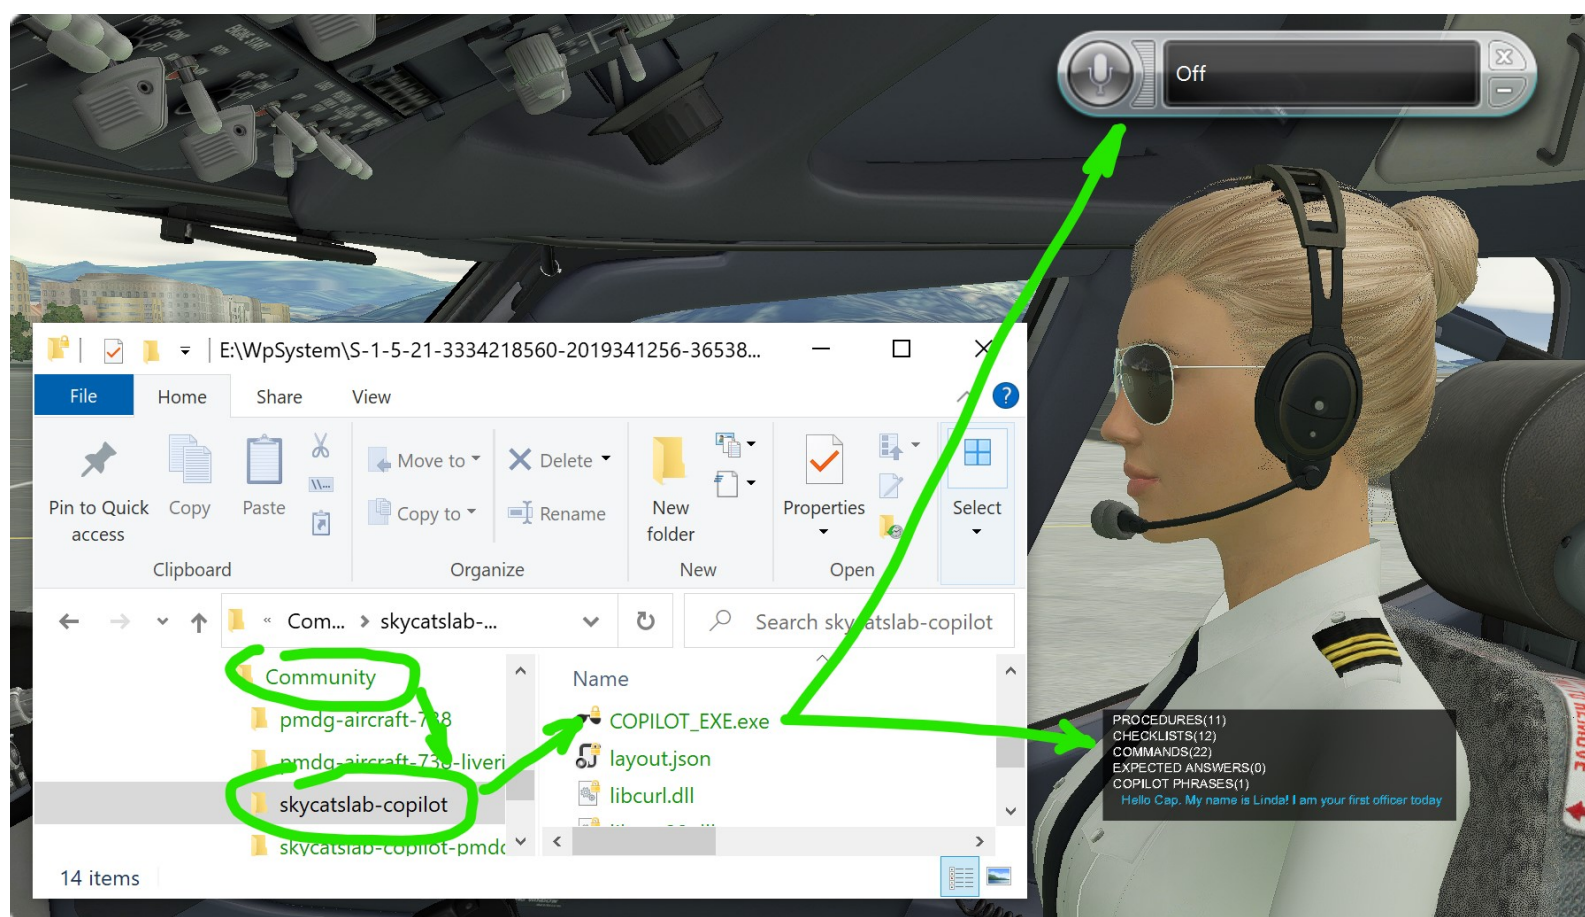

6. Load selected aircraft with selected livery and you should see copilot object in copilot seat.

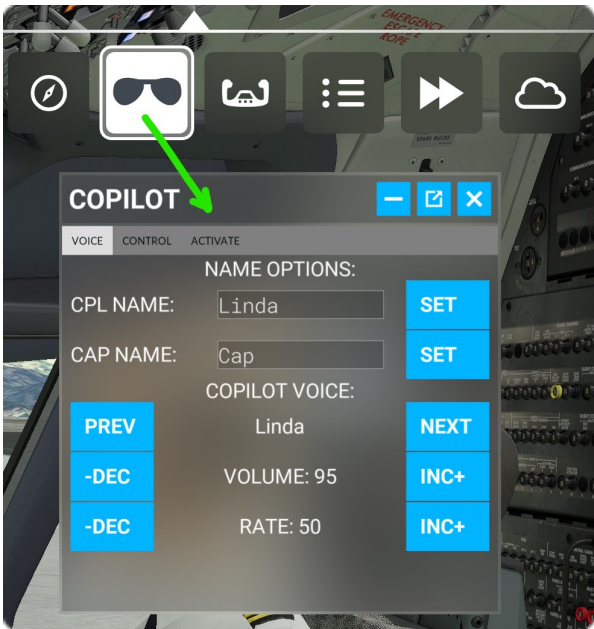

7. RUN EXE FILE as Administrator

Without COPILOT_EXE file running, Linda will just seat in the cockpit with some moving and pose changes. To make it alive you need run .exe file. Please open "../Community/skycatslab-copilot/" folder, find and run COPILOT_EXE file there and back to simulator.

You will see speech recognition widget and copilot operation widget.

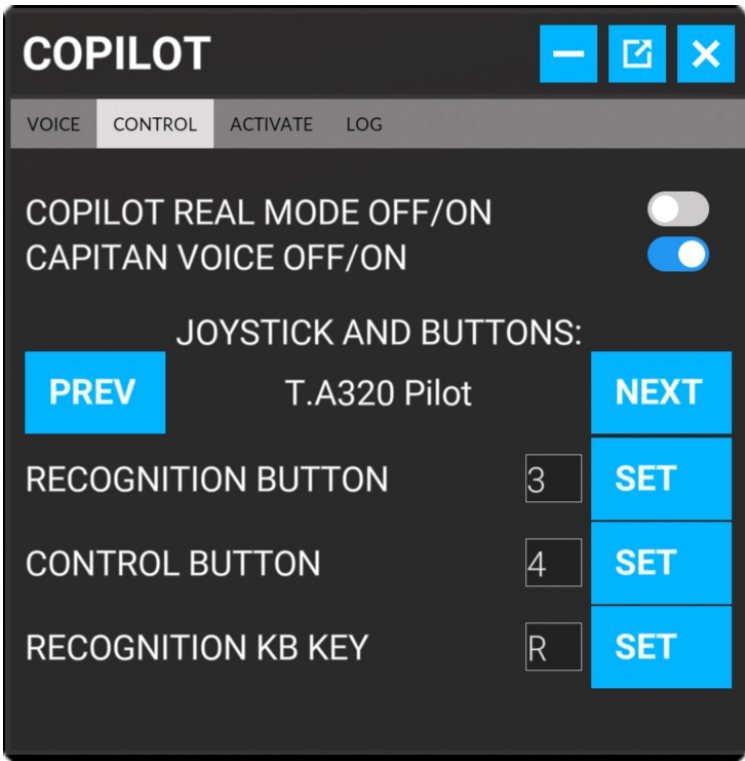

TOOLBAR USAGE

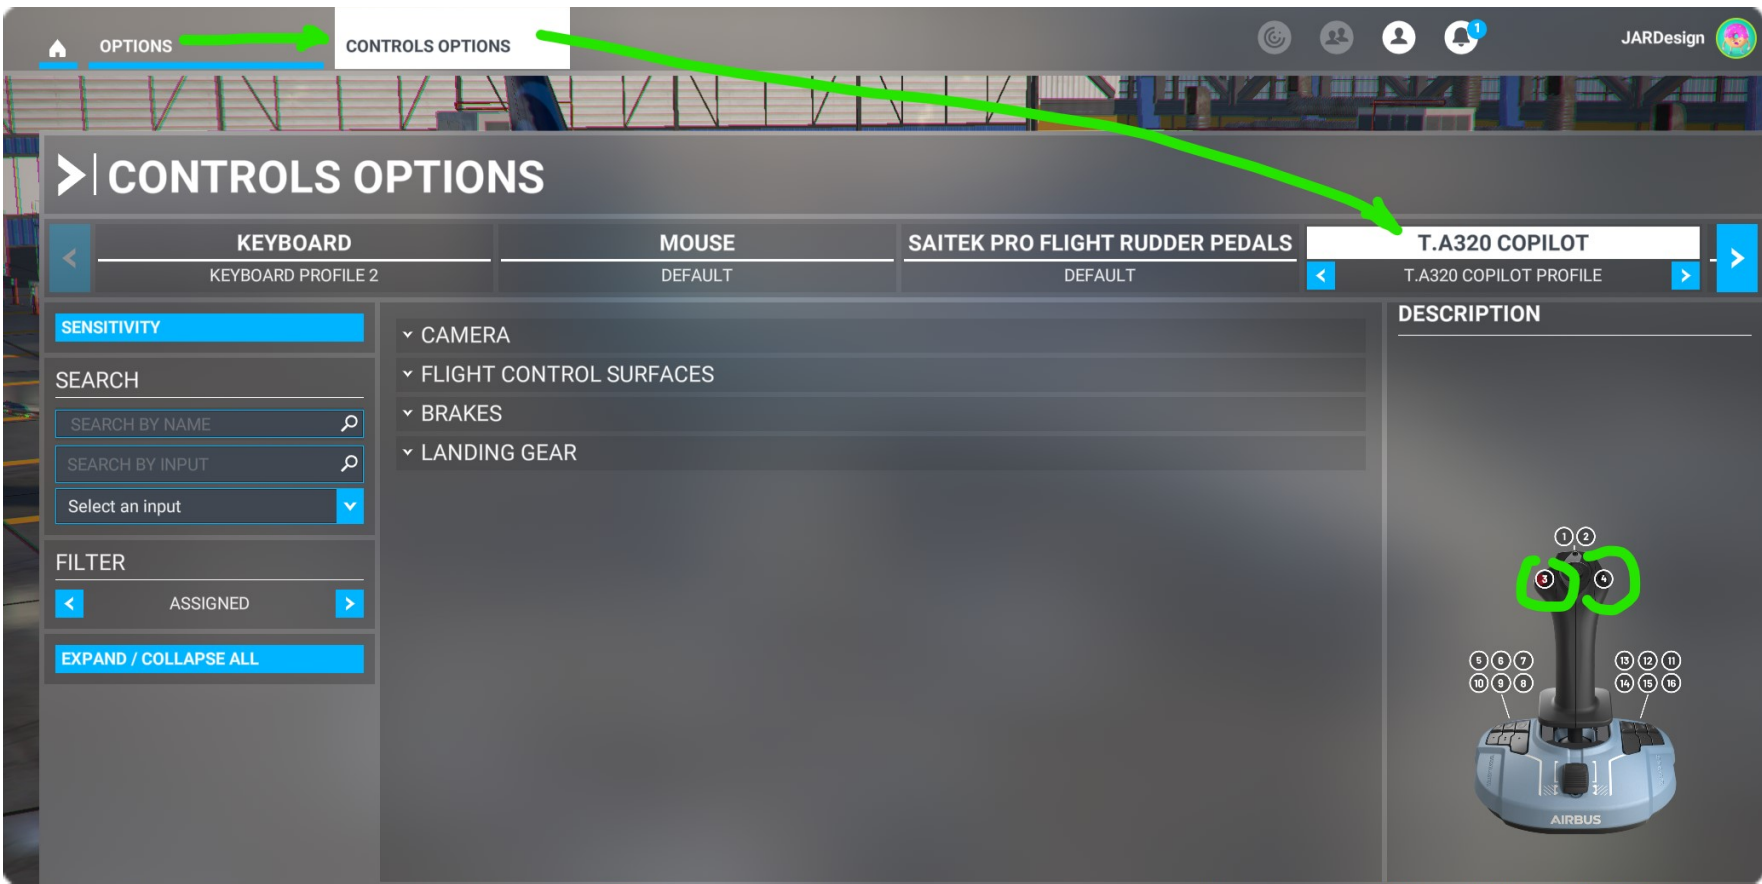

Click on copilot icon to open settings and activation tabs:
VOICE > CONTROL > ACTIVATE.

On VOICE tab you may Copilot name, Your name, Copilot voice, Copilot volume and Copilot speech speed (Rate). Please click "SET" button to confirm name input.

On CONTROL tab you may switch copilot widget Off if you really not need it (use voice input only). You may select copilot "Real" option On or Off. The "Real" mode option allows the user to perform some procedures on their own, as well as fuel supply when starting the engine - this corresponds to more real procedures. You may find the list of the "Real" mode features some below.

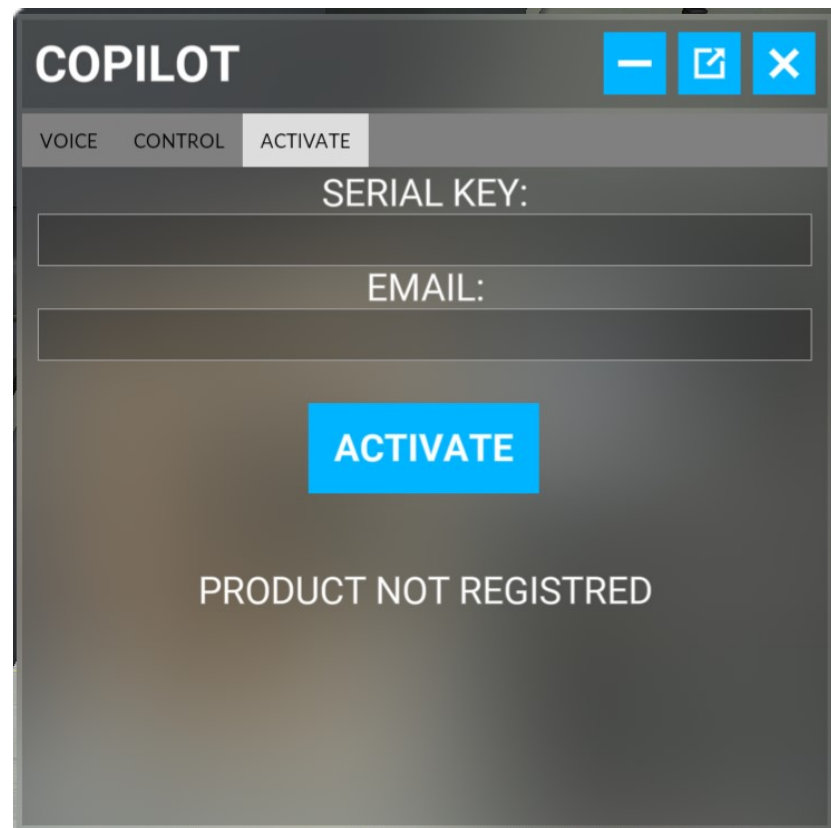

Also, on CONTROL tab you may Select keyboard key for user voice recognition, select joystick, joystick button for voice recognition and joystick button for copilot widget operation (select and confirm selected text input). On this example as recognition was selected button No3 and button No4.

REAL MODE feature

1. Electrical power up procedure - Captain or First Officer(Normal mod)
2. Preliminary Preflight Procedure - Captain or First Officer(Normal mod)
3. Preflight Procedure - Captain(Normal mod)
4. Preflight Procedure - First Officer(Normal mod) The Captain normally does this procedure(Real mod)
5. Before Start Procedure - Captain or First Officer(Normal mod)
6. Engine Start Procedure -First Officer does this procedure(Normal mod) The Captain normally does fuel flow(Real mod)
7. Before Taxi Procedure - Captain(Normal mod)
8. Before Taxi Procedure - First Officer(Normal mod)
9. Taxi Procedure - Captain or First Officer(Normal mod)
10. Descent Procedure - Captain(Normal mod)
11. Descent Procedure - First Officer(Normal mod)
12. After Landing Procedure - Captain(Normal mod)
13. After Landing Procedure - First Officer(Normal mod) Co-pilot does not release speedbrakes(Real mod)
14. Shutdown Procedure - Captain(Normal mod)
15. Shutdown Procedure - First Officer(Normal mod)
16. Secure Procedure - Captain(Normal mod)
17. Secure Procedure - First Office(Normal mod)

On ACTIVATE tab you may enter your serial key and email, click on ACTIVATE button and some later (up to one minute) you will get activation message. Non-activated addon work in DEMO mode - all functions work until you on the ground. To operate copilot during flight you need activate it with payware serial key. Ctrl+C working there.

WIDGETs USAGE

For voice input - **You need** to have microphone or headset. Speech recognition should be setup and checked on your Windows settings before copilot addon installation.

For mouse click input - **You need** setup your Windows/MACOS speech settings only and skip voice recognition setup.

You may speak with CoPilot via voice or select commands via Menu or select command via widget. When you run checklist - expected answers (clickable) will be indicated in yellow.

If you prefer voice control, you need setup special joystick (sure, keyboard may be used too) button. You may look at CoPilot, hold this joystick button and say something like "Hello!" Typical pattern - press the button, say the text, release the button.

HOW TO UNINSTALL ADDON

1. Find your "Community" folder.
2. Delete all skycatslab-copilot folders from "Community" folder.
